AMBER GLOW

Exuding positivity, the Amber Glow colour group beautifully elevates the mood. Perfect when paired with terracotta and brown tones, it enriches a space and lends itself to decorative elements within any room.

Remaining robust for autumn winter 22/23, yellow will be reimagined in buttery yellow, or 'honeycomb' shades, with warmer, golden yellows on the agenda in autumn/winter 23/24.

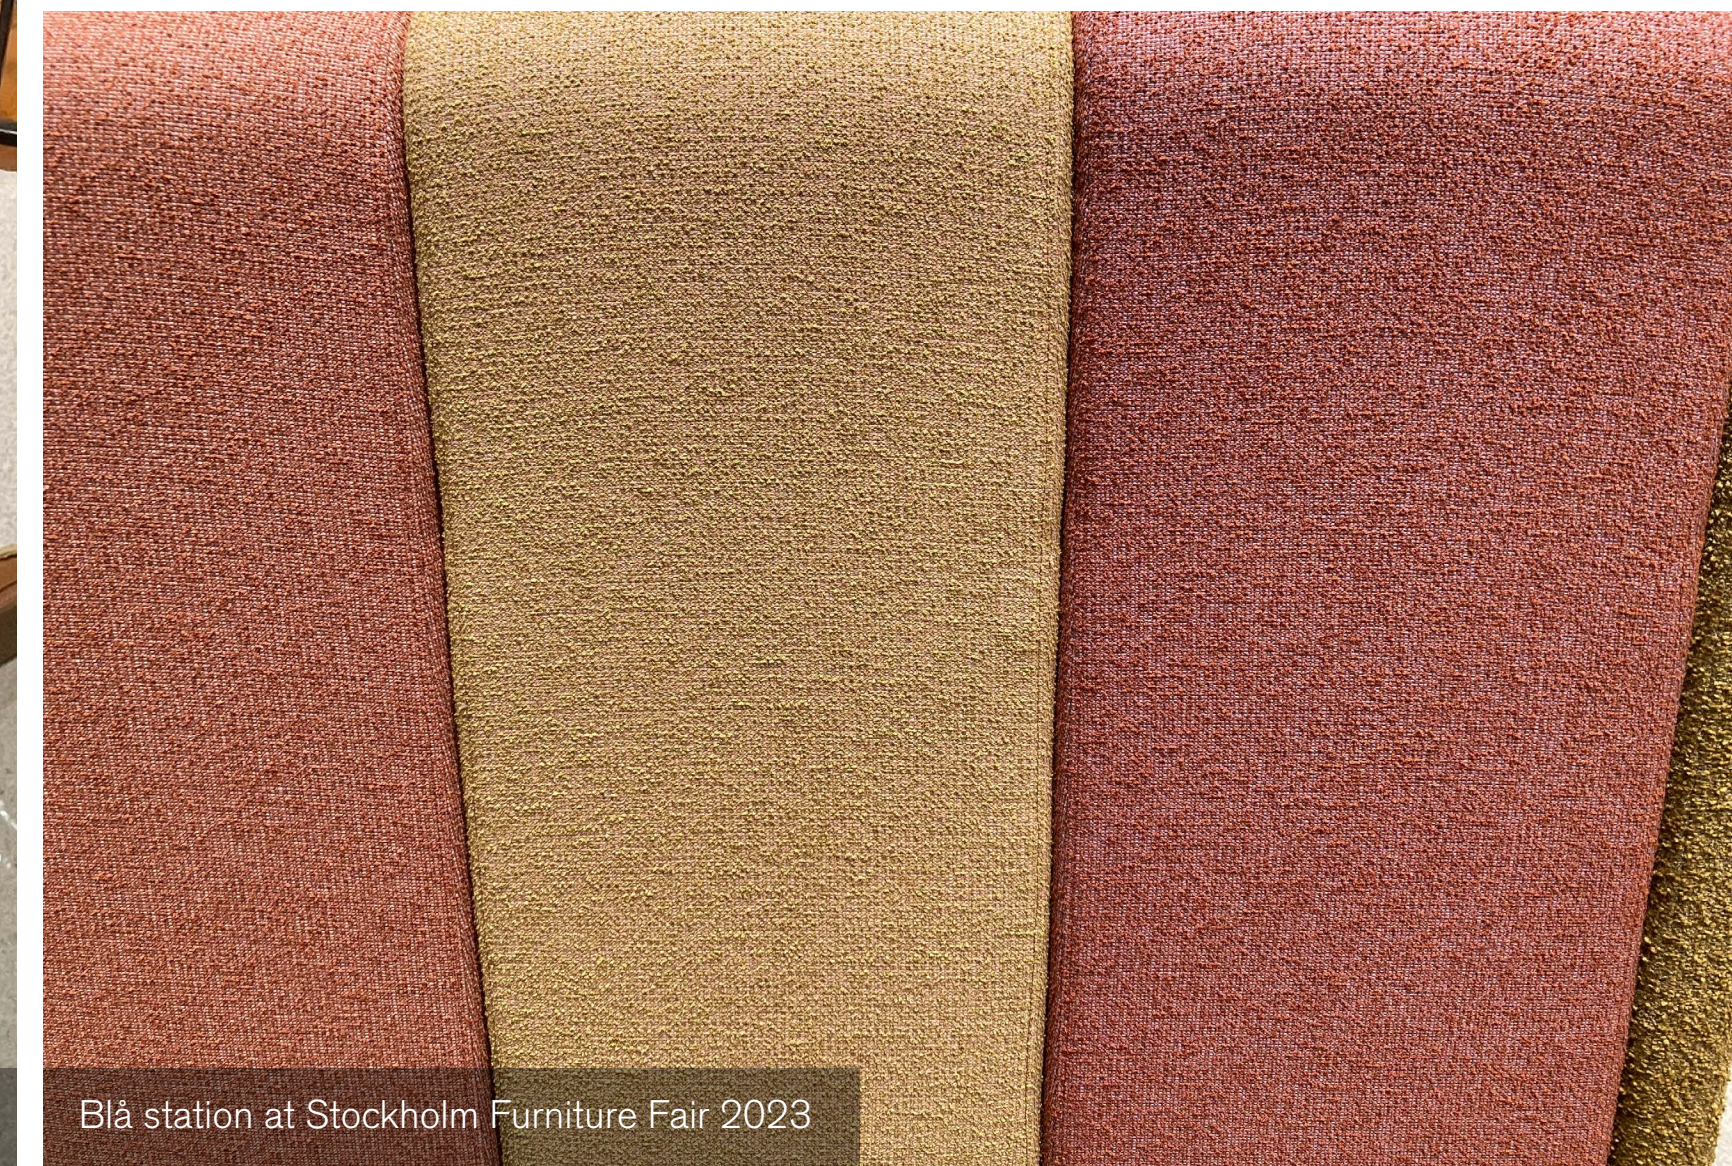

In evolutionary terms, yellow will become softer – and as we move through to 2024/25, the hue is much richer, with a gold hint. By spring/summer 24, calming yellow shades will be instrumental, as will grounding shades like mustard.

ORIGINS & INFLUENCES

Taking inspiration from the sun – and the way we feel when we're basking in it, at one with nature – the Amber Glow colour group provokes physical and emotional wellbeing. Offering respite by bringing the outdoors in, the shades can be used in small amounts to add highlights, or in larger, rug areas to create a bold and interesting aesthetic.

In a post-pandemic world, the future of interiors is bright. The future is yellow.
